SUNDAY, JANUARY 1, 1950

1st  
Day

*Happy New Year*

364 Days  
to come

Still below par from a cold, but  
at least out of bed. Did a lot of  
miscellaneous work to catch up.  
Put the recently bound books away.

MONDAY, JANUARY 2, 1950

✓ 2nd  
Day

363 Days  
to come

Feeling better today. Worked all day and late into the evening on the reptile library. Selected a lot more material to be bound (it still requires instructions to binder, which will take a day to prepare). Rearranged a lot of books. A lot of work could be put in on the library; a day like today shows how much it has been neglected. I could spend all my spare time just writing for separates, but I have no idea of doing anything like this. Having spent most of my avocation time from 1922 to 1925 on the library, I woke up and decided to go after herpetology rather than herpetological literature. I have no idea of back-tracking now, but it pains me to see so good a library suffer. At least I haven't passed any good items offered for sale, but the pamphlet foundation has suffered; and many items required to complete papers that were published in sections, are missing.
